

## Video Rubric

Criteria	Great - 5	Good - 4	Satisfactory - 3	Poor - 1
Problems       /30	The two examples are good exemplars of the topic and are appropriate difficulty for chemistry 2202 students. The problems are completed correctly and all steps are illustrated and explained clearly	The two examples are good exemplars of the topic and are appropriate difficulty for chemistry 2202 students. The problems are completed correctly, but units, formulas or significant digits are done incorrectly.	Either the two examples are too easy for the topic in chemistry 2202, but are done correctly, or there are minor mistakes in completing the problems. Explanation of the problem does not make sense when listened to.	Examples are poor examples of your topic, or are done completely wrong. Steps/units are ignored and significant digits are done incorrectly.
Video      /30	The video is clear and the writing is easy to pick out without any difficulty. There is no shaking in the camera during the video.	The video is clear, but the writing is a little small making it difficult to pick out what is being written down. There is no shaking in the camera during the video	Either the video is unclear making it difficult to see what is written or there is severe camera shake making the video difficult to watch.	For some reason no pictures are used in a graphical display
Sound      /30	The voice over is clear and it is easy to understand exactly what is being said. Speech is not monotonous and you can hear enthusiasm in the voice of the narrator drawing the viewer into the problem.	The voice over is clear, but either the narrator is monotonous and boring or they are speaking too fast making it difficult to understand everything they are saying	There is a major problem with the sound. It could be too quiet to be heard, or a little garbled making it difficult to understand. Speech could be so fast that you can't figure out what is going on. Maybe you spoke in French...	The sound did not come out correctly and you cannot understand what the narrator is saying. IT goes without saying that if there is no sound at all you will get 0.
Formatting      /10	Video is oriented correctly, problems are introduced clearly, there are no jumps in the video and sound matches up to the video	Only one issue with the formatting listed under "great"	Two issues with formatting	More than two issues with the formatting of your video.
